Tension Fabric Structures
www.milestonesbd.com

Committed to providing ingenious building solutions, quality tension fabric structures for industrial, commercial, agricultural, sports, recreational, public works, and custom applications (countless uses), up to 300+' wide X any length, fully code compliant, for temporary or permanent use, with superior service, and world class support.

Industrial

Bulk commodity storage is one of the top industrial applications for tension fabric buildings; quick to install, provide a vast clearspan area for storage & can be relocated to another site. Other industrial uses are manufacturing, maintenance shops, fuel & lubrication facilities, equipment wash areas, aggregates storage & warehousing.

Commercial

Commercial tension fabric structures provide plenty of room for facilities like meeting rooms, wedding venues, special events, concerts, offices, and more. They offer faster install, strength, versatility, natural light, wide-open space with no interference from poles or columns, no obstructed views & reduced costs.

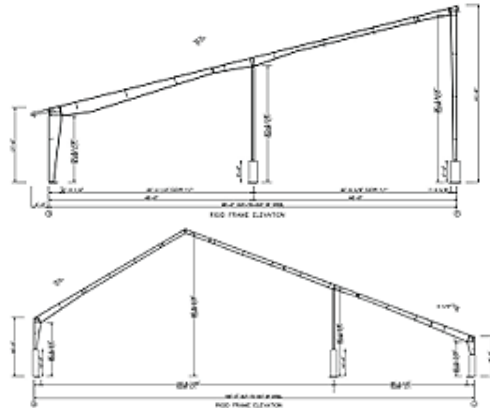

Agricultural

Ideal for any agricultural application; hay & grain storage to large scale dairy operations. Tension fabric structures can facilitate any type of animal or livestock operation; will promote happy, healthy animals. Natural light has shown to dramatically increase milk production. These buildings are extremely easy to build on & extend.

Customer Specific

Get it your way, a fully customizable fabric covered building, solid steel trusses, cost effective pricing.

Customer Specific: width, height, variable leg heights, variable center heights, variable roof slope, eaves, dormers, standard windows and doors.

Sports & Recreational

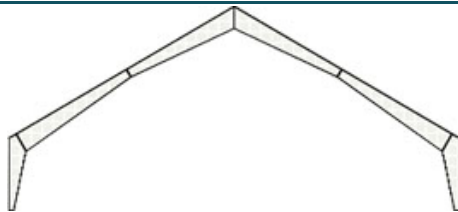

Tension fabric structures are used for basketball complexes, hockey arenas, tennis courts, swimming enclosures, golf cart storage, equestrian facilities, butterfly gardens, day care & camp shelters, exhibition halls, float storage facilities & numerous back-stage applications.

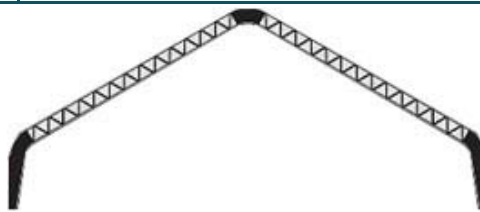

Public Works

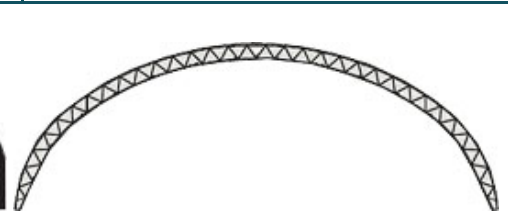

Fabric structures provide ample height-clearance for loading & handling, and entry/exit access, no internal columns to interfere with bays, trucks, tools, or heavy machinery & weather protection. Low in cost per sq ft, quick to install, minimal foundation requirements & easy to maintain.
